Encore Active FX CO2 Lite Laser Facial Resurfacing

Dr. Steve Zakany is the first physician trained & offering this revolutionary technique in Colorado.

Encore Active FX is CO2 laser resurfacing for the active person. It is a single treatment that provides significant results. The main advantage compared to standard CO2 Laser resurfacing is that the downtime and aftercare is decreased to only 4 to 5 days.

The Encore is used to vaporize lines, wrinkles, scars, dark spots, acne and other irregularities, layer by layer. It stimulates the formation of new, underlying collagen to provide elasticity and support for the skin.

Benefits include:

- ? No Cutting - No Needles – No Bruising
- ? **Dramatic Results In One Week!**
- ? Safe, natural and effective
- ? Tightens facial skin, reduces pore size
- ? Reduces fine lines and wrinkles
- ? Eliminates unwanted pigmentation
- ? Improves skin texture
- ? Six months of continuous collagen growth after procedure

Schedule a free consultation to see if this is the right procedure for you.
